

Polarion REQUIREMENTS - User Training

This course will give you a detailed overview on how to use Polarion REQUIREMENTS in your daily work as requirements engineer. You will learn how requirements can be tracked and managed with Polarion. You will become familiar with the different ways to author requirements by using the different front ends:

- Web-based requirements designer
- Polarion LiveDocuments Technology
- Integrated Wiki

Traceability is a key element to successfully manage requirements. Practical exercises will teach you how to manage traceability in your projects with Polarion REQUIREMENTS. You will learn how to create professional requirements documents for sign-off as well as how to plan requirements to different milestones.

Agenda
